PROJECTS

Digital Development Center Management System - Full Stack Developer

- Engineered an on-premise platform centralizing guest, workstation, event, and report management for DICT centers.
- Built a role-based admin dashboard with JWT authentication, audit logging, real-time PC monitoring, and CSV exports.
- Developed a browser-based kiosk that validates guest tickets and restricts access to assigned PCs in real time.
- Tools Used: React, Node.js, Express, MongoDB, Mongoose, Socket.IO, Material UI, JWT, Docker, REST API, QR Code integration

MDLAB DIRECT - Full Stack Developer

- An integrated web and mobile system developed for a diagnostic laboratory to improve medical record management and support better decision-making.
- Tools Used: React + Vite, MongoDB, Expo, Express.js, Node.js

Eskora - Mobile Application Developer

- Developed a Kotlin mobile scheduling app, a simplified Google Calendar alternative without the complications.
- Delivered a color-coded weekly timetable with Today, Schedule, Planner and School views for easy class tracking.
- Tools Used: Kotlin, Jetpack Compose, SQL, Firebase

KantoPay - Product Developer

- Drove the product: a store sellers set up themselves to sell ranks, in-game items, downloads and custom work, with checkout, gift cards, coupons and payouts
- Developed the store builder, where sellers drag and drop sections to make their page, or describe their business and have an AI lay it out
- Specified the public and server APIs and the signed webhooks that deliver a purchase once the payment clears.
- Tools Used: Nuxt.js, Vue.js, Vuetify, Stripe, AWS (CloudFront), Cloudflare
